EDUCATION

Kamla Nehru Institute of Technology

Bachelor of Engineering in Electronics CGPA: 8.91

Sultanpur, Uttar Pradesh

Oct 2023 – Jun 2027

Lucknow Public School

Class XII – 96.2%

Uttar Pradesh

2022

Lucknow Public School

Class X – 97.2%

Uttar Pradesh

2020

TECHNICAL SKILLS

Programming: Java, Python, JavaScript

Electronics: Analog Electronics, Digital Electronics, Electronic Devices, DC Circuits, AC Circuits, Signals & Systems, Network Theory, MATLAB, Relay Protection, Electrical Measurements

Web: HTML, CSS, React.js, Next.js, Node.js, Express.js, REST APIs

Database: MongoDB

Tools: Git, GitHub, Postman, Cloudinary, Vercel

INTERNSHIP

Summer Intern

June 2026 – July 2026

Rolling Stock Workshop, Northern Railway, Charbagh, Lucknow

- Studied types of relays used in MEMU coaches and their applications in railway electrical control systems.
- Performed relay overhauling, inspection, testing and preventive maintenance under workshop supervision.
- Observed electrical control panels, relay protection systems and industrial maintenance practices.
- Gained practical exposure to railway safety procedures and electrical equipment maintenance.

PROJECTS

OpenAlbum

Mar 2025

React.js, Tailwind CSS, Appwrite, Cloudinary

- Developed a full-stack photo sharing platform with secure authentication and cloud storage.
- Implemented responsive UI and deployed the application on Vercel.

Fire Alarm System (Minor Project)

Jan 2026 – Apr 2026

Electronics Engineering Project

- Designed and developed a fire alarm system capable of detecting abnormal temperature conditions and triggering an audible alarm for early fire detection.
- Integrated electronic components including temperature sensors, transistors, resistors, buzzers and power supply circuits to ensure reliable system operation.
- Performed circuit design, component testing and hardware debugging to improve the accuracy and stability of the alarm system.
- Enhanced practical understanding of analog electronics, electronic devices, circuit analysis and fault diagnosis through hands-on implementation.

Solar Powered Smart Street Light (Major Project)

Aug 2026 – Present

Electronics Engineering Project

- Designing and developing a solar-powered street lighting system to provide an energy-efficient and sustainable outdoor lighting solution.
- Integrating photovoltaic (PV) panels, rechargeable battery storage, charge controller, LED lighting and automatic switching circuitry for efficient power management.
- Implementing automatic day/night operation using light sensing techniques to optimize energy consumption and improve system reliability.
- Applying concepts of power electronics, renewable energy systems, circuit design and embedded control during the project development phase.

ACHIEVEMENTS

- Solved **250+** DSA problems on LeetCode.
- Secured **6th Position** in Smart India Hackathon (Internal Round).
- Participated in Hack O' Gravity Hackathon organized by TCS.
- Maintained a CGPA of **8.91**.

CERTIFICATIONS

- Oracle Cloud Infrastructure AI Foundations Associate.
